AADIL VARSHANI

THREAT DETECTION ENGINEER

Pune, India | aadilvarshani@gmail.com
linkedin.com/in/aadil-varshani | github.com/aadilvarshani | aadilvarshani.github.io

PROFESSIONAL SUMMARY

Threat Detection Engineer with **3+ years** in MSSP/MDR environments, building, tuning, and validating detection content across **8+ SIEM and EDR platforms**. Works with detection-as-code using Sigma and pySigma, **MITRE ATT&CK** coverage mapping, and detection gap analysis. Also builds security tooling, including ReaperWatch, an open-source Windows EDR.

CAREER HIGHLIGHTS

- **8+ SIEMs and 4+ EDR/XDR platforms:** author and tune production detection content across Splunk, Microsoft Sentinel, Google SecOps, Elastic, QRadar, LogRhythm, CrowdStrike, and Defender.
- **1.2M+ endpoints** monitored 24/7 across multi-tenant MSSP environments, with hands-on incident response for ransomware and credential theft.
- **Led a global standardisation initiative** for LogRhythm MPE rules, replacing per-customer parsing with a reusable baseline used across the estate.
- **Built ReaperWatch**, an open-source Windows EDR in C++ and Node.js with an ETW telemetry agent, detection engine, and dashboard. 4 releases shipped.

PROFESSIONAL EXPERIENCE

ReliaQuest | Threat Detection Engineer — Jan 2025 - Present | Pune, India

- Build, tune, and validate detection content across **8+ SIEMs**, including Splunk (SPL), Microsoft Sentinel (KQL), Google SecOps/Chronicle (UDM), Elastic, IBM QRadar, LogRhythm, ArcSight, and Sumo Logic, and EDR/XDR platforms including CrowdStrike, Microsoft Defender, Carbon Black, and SentinelOne.
- Develop and fine-tune correlation rules mapped to **MITRE ATT&CK**, closing detection gaps and **reducing false positives** across multi-tenant customer environments.
- **Initiated and led global MPE rule standardisation** in LogRhythm, replacing per-customer parsing with a reusable baseline and closing coverage gaps.
- Conduct **detection gap analyses** across customer SIEM environments, delivering detection enablement plans and log source prioritisation guidance for CIM-compliant ATT&CK coverage.
- Perform ongoing **threat research** on APT campaigns, malware families, and adversary TTPs, and use the findings to write new detection rules.
- Analyse endpoint, cloud (AWS, Azure, GCP), and network telemetry to design detections and advanced log parsers for inconsistent multi-vendor log sources.

ConnectWise | Security Analyst — Aug 2023 - Jan 2025 | Pune, India

- Delivered 24/7 threat monitoring across **1.2M+ endpoints** and multiple partner tenants using SentinelOne, Bitdefender, and Microsoft Defender.
- **Led incident response** for ransomware (LockBit), credential theft (Mimikatz), loaders, droppers, and commodity malware, from triage through containment and root cause analysis.
- Performed static and dynamic malware analysis with sandbox detonation to identify threat behaviour and extract IOCs.
- Handled alert triage, log analysis, and escalations in an MSSP/MDR SOC, and provided tuning recommendations for detection content.

Capgemini | Software Associate — Oct 2022 - Aug 2023 | Pune, India

- Administered and secured **Active Directory** infrastructure for **5,000+ users** across multiple domains.
- Implemented access controls and Group Policy aligned to least-privilege principles, and monitored AD audit logs for suspicious authentication and privilege escalation activity.

SECURITY PROJECTS

ReaperWatch: Open-Source Windows EDR — Jul 2026 - Present

- Built a Windows EDR with a **C++ agent** that captures real-time process telemetry via **Event Tracing for Windows (ETW)**, enriched with file hashes, signature status, user context, and process lineage.
- Wrote a **declarative detection engine** using an Elastic Query Language (EQL) subset over a Node.js and SQLite backend, with a web dashboard for alert triage and threat hunting.
- Distributed as a self-elevating executable with no external dependencies, with durable JSONL logging and optional central console ingestion. 4 tagged releases to date; kernel driver work in progress.

Detection Lab: Detection-as-Code Range 2025 - Present

- Running an Active Directory, Kali, and Splunk range. Writing Sigma rules per ATT&CK technique, auto-converted to SPL, KQL, and Google SecOps UDM through a pySigma CI pipeline.

Bulk IP Reputation Lookup Oct 2024

- Concurrent Python utility for bulk IP reputation enrichment via the VirusTotal API.

TECHNICAL SKILLS

Detection Engineering: Detection-as-Code, Sigma, pySigma, MITRE ATT&CK mapping, detection gap analysis, correlation rule development, false positive tuning, detection validation, CIM, OCSF

SIEM & Analytics: Splunk (SPL), Microsoft Sentinel / Azure Sentinel (KQL), Google SecOps / Chronicle (UDM), Elastic (ELK), IBM QRadar (AQL), LogRhythm, ArcSight, Sumo Logic, CrowdStrike NG-SIEM, Cortex

EDR / XDR: CrowdStrike Falcon, Microsoft Defender for Endpoint, SentinelOne, VMware Carbon Black, Bitdefender, ReliaQuest GreyMatter

Threat Operations: Threat hunting, threat research, threat intelligence, incident response, DFIR, malware analysis, alert triage, log analysis, advanced log parsing, RegEx

Programming & Platforms: Python, PowerShell, Bash, C++, JavaScript/Node.js, SQL, Windows internals, ETW, Sysmon, Active Directory, AWS, Azure, GCP, Linux

Tooling: Wireshark, Suricata, Burp Suite, OWASP ZAP, VirusTotal, Git, GitHub Actions, IDS/IPS, firewalls

TECHNICAL WRITING

Writes technical posts on endpoint detection and Windows internals at aadilvarshani.github.io, including the series *"Where Did That Process Go? Building an EDR"*, covering ETW sensor development and process event capture on Windows 11.

EDUCATION

Master of Computer Applications (MCA) | SRM Institute of Science and Technology 2023 - 2024

Bachelor of Computer Applications (BCA) | Sant Gadge Baba Amravati University 2019 - 2022

CERTIFICATIONS

Google Cybersecurity Professional Certificate | Google, via Coursera

Coursework: Threat Hunting & Incident Response | IT Security: Defense Against the Digital Dark Arts | Windows Server Management and Security | The Bits and Bytes of Computer Networking | Computers, Operating Systems and Security
